SUMMARY

8 year veteran player who has maintained consistent production throughout his career and recently been in a platoon situation with other backs. Excellent size with good agility and average athleticism/quickness. Displays good lane identification skills and hits the hole decisively. Focuses on the front side of the play to maximize positive plays, thereby limiting negative gains. Uses superior functional strength, leg drive and balance to generate yards after contact and can use his lateral elusiveness to maximize gains. Has been used successfully in short yardage situations to take advantage of these qualities and his competitive toughness. Willing, chippy pass protection blocker with excellent blitz identification skills and the strength to anchor against larger defenders. Soft hands and good ball awareness as a receiver. This player also paid attention to ball security, using good technique in both running and passing plays to protect the ball. Reticent to improvise, rarely cutting back. Lacks of top play speed to generate large gains. Yards after catch limited in pass receiving situations due to lack of elusiveness in the open field. Overall, a functional runner well-suited for short yardage situations and consistent though limited production. Excellent performance in passing situations, where his competitive toughness, blocking skills, and good hands can be utilized.
